

# PROBLEMS Test Cases Meeting 28.11.2018

## USER COMPANY

1. Register a user
  1. Maybe a message/note previously that the password needs to be at least six characters.
2. Login
3. Submit a job posting
  1. Maybe details, what the different details are meant to be. (title "CEO" would not make any sense)
  2. Fix bug with pensum. Only numbers from 0-100. Not able to type other character than numbers. Maybe dropdown menu.
4. Edit a job posting
5. Delete a Job
  1. Fix refresh problem after deleting a job
6. View your Own posting
7. Change Password
8. Update Username
9. Update Password
10. Logout
  1. Maybe a logout message
11. Login again
12. Delete Profile
13. Change Language
  1. Finish translation. Maybe default language for every user?

## ADMIN

1. Login as admin
2. CRUD operations on a job posting
  1. Refresh problem after editing/deleting a job
3. CRUD operations on a users
  1. Maybe hover effect that you see that you can type on users to edit them
  2. Fix problem with password
4. Approve a job posting
  1. Maybe a save button you can hit after you approved a job offer.
5. Make somebody an admin
  1. Maybe in formation for admin what roles are for.
6. Logout
  1. Logout message
